PROJECTS

Van Growl

An SSR-enabled eCommerce website built using Next.js, and GCP.

Good Cup

A simple React companion application for Good Cup Coffee that helps you create a perfect cup of coffee.

Golden State Greens

An SSR-enabled eCommerce website built using Next.js and consumes Salesforce API endpoints.

EXPERIENCE

Software Engineer at STR8LINE

Feb 2021 - Present • Remote

Uses React for creating our web platform.
Designs RESTful backend services with Elixir and PostgreSQL as the database. Creates microservices using, but not limited to Go and Node.js. AWS and Heroku are used for deployment.

Software Engineer at VISEO Asia Pte. Ltd.

Sep 2018 - Feb 2021 • Cebu City

Uses React, React Native, and Vue.js in creating multiple web applications for different clients.
Designs RESTful backend services with Node.js and connects to any of these databases: MongoDB, PostgreSQL, and MySQL. AWS and GCP are also used for cloud services.

Software Engineer at A-FIS Pte. Ltd.

Oct 2017 - Sep 2018 • Cebu City

Uses jQuery, React, and Vue.js in creating multiple web applications that display Instagram analytics, widget view, and digital wallet.
Designs RESTful backend services with Go and MySQL. AWS is also used for cloud services; Solidity and Hyperledger for the creation of the blockchain.

Software Engineer at Accenture, Inc.

Dec 2016 - Oct 2017 • Cebu City

Focuses on SFCC and jQuery to build the client's next eCommerce website.

Software Engineer at Global Zeal, Inc.

Oct 2013 - Dec 2016 • Cebu City

Uses the original AngularJS in creating the next educational and learning platform for School Improvement Network.
Designs RESTful backend services with Node.js alongside PostgreSQL and MongoDB.

EDUCATION

University of San Carlos

Cebu City

Bachelor of Science in Computer Engineering
