San Francisco, CA

Summary

Fullstack Software Engineer with over 10 years of experience, focusing on, but not limited to, Elixir, Go, Node.js, React, React Native, and Vue. Results-driven with proficiency in designing, and implementing applications. Self-motivated, directed, and demonstrated ability to succeed in team-based environments. Outside of work, I maintain a homelab to explore new tools and test out new technologies, and shoot street and architectural photography on film.

Skills

Agentic AI, Amazon Web Services, Google Cloud Platform, Docker, Elixir, Go, JavaScript, NoSQL, RDBMS

Experience

Software Engineer

The Travelers Companies, Inc. • Remote 09/2022 - Present

Uses Angular, React, and React Native to create and maintain multiple web applications. Design RESTful backend services with Node.js while maintaining legacy .NET services. AWS is heavily utilized for cloud services, and Claude Code for agentic AI.

Software Engineer

STR8LINE • Remote 02/2021 - 09/2022

Uses React to create the company's web application. Design RESTful backend services with Elixir and PostgreSQL as thedatabase. Creates microservices using, but not limited to Go and Node.js. AWS and Heroku are used for deployment.

Software Engineer

VISEO Asia Pte. Ltd. • Cebu City, Philippines 09/2018 - 04/2022

Uses React, React Native, and Vue.js to create multiple web applications for different clients. Designs RESTful backend services with Node.js and connects to any of these databases: MongoDB, PostgreSQL, and MySQL. AWS and GCP are also used for cloud services.

Software Engineer

A-FIS Pte. Ltd. • Cebu City, Philippines 10/2017 - 09/2018

Uses jQuery, React, and Vue.js to create multiple web applications that display Instagram analytics, widget view, and digital wallet. Designs RESTful backend services with Go and MySQL. AWS is also used for cloud services; Solidity and Hyperledger for the creation of the blockchain.

Education

Bachelor of Science in Computer Engineering

University of San Carlos • Cebu City, Philippines
